

UGAS common course	1 Credit
<p>Brief description</p> <p><Objectives> Students make a presentation about their research and dissemination activities that are not directly related to their research theme. Skills and knowledge that are required for professional scientists are discussed and advised.</p> <p><Lecture outline> Instruction is given to working students on how to conduct and disseminate their research.</p> <p>1) Planning: Students make a plan about research and dissemination activities that are not directly related to their research themes (for example, making presentation to the general public or serving as an instructor in a public program organized by their institution/company) and discuss the plan with their major advisory professors.</p> <p>2) Implement: Students implement the plan while regularly discussing progress with their advisors.</p> <p>3) Presentation: Students generate a report on the specific activities, results and items found to be improved. The report and documentation to demonstrate the activities are submitted to the major advisory professor, and a presentation is given regarding the activities in a reporting session.</p> <p>4) Review: Students receive suggestions and instruction from the audience of the session.</p>	
<p>Grading</p> <p>The report should be written using From 7 and about 5-page long. It should include a description of activities, results and items found to be improved. The report and documents to prove the actual implementation of activity should be submitted to the major advisory professor before the date instructed by the professor.</p> <p>Evaluation will be made comprehensively based on the reports and presentation.</p>	
<p>Special instruction</p> <ul style="list-style-type: none"> -Examine whether this course is compatible with your job conditions and consult your major advisory professor about your plan before registering for the course. -Course registration can be done even if the specific dates and activities are not known at the time of registration. Describe the approximate dates and expected activities in the plan. -UGAS professors may not able to attend the activities conducted at the workplace. Consult with the major advisory professor about the activities when the plan is finalized. -Reports should be presented to the major advisory professor immediately after the activities are completed. -Consult the major advisory professor regarding the date/time and venue of the presentation.
